## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8, drawn to "a method of testing a cable", classified in class 324, subclass 539.
  - II. Claim 9-10, drawn to "a method of testing fluid intrusion into cable", classified in class 324, subclass 694.
  - III. Claims 11-20, drawn to "a system for testing including eddy current and RF", classified in class 324, subclass 207.26.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the cable testing of group I does not require a transducer cable system with fluid detection or different frequencies of group II. The subcombination has separate utility such as a method for specifically testing fluid intrusion into cables.

Art Unit: 2858

3. Inventions I, II and III are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another and materially different apparatus such as a device which does not require an eddy current transducer positioned in RF communication with a target, where the transducer is configured to generate an output signal relative to a gap distance.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
